

## WE LOVE OUR PLANET!

Marriott was the first major hotel chain to calculate our carbon footprint and launch a plan to improve energy efficiency, conserve water and support projects that reduce deforestation.

At Courtyard by Marriott® Milwaukee Downtown, we've taken the following steps to lessen our impact:

- Linen wash water and detergent reduction program
- Energy efficient lighting
- Recycling of plastic, glass and cardboard
- Energy-efficient guest room AC units
- Linen donations to charities

For your next event or stay in the Milwaukee area, consider seeing all our hotel has to offer, including spacious guest rooms and over 2,600 square feet of meeting space.

### REDUCE YOUR MEETING FOOTPRINT

To learn more about our hotel's environmentally-friendly initiatives, give us a call using the number below.
